WIRELESS DOWNLOAD VIDEOMANAGER SERVER LIVE STREAMING VIDEO

WIRELESS DOWNLOAD

Complete Integrated Wireless Download Solution

- No laptop or MDC required for file transfer.
- Secure and Automatic file transfer upon successful connection to the network.
- Automatic removal of files from the CF card after the files are successfully transferred and verified for integrity.
- If the connection to the network is lost or the transfer is interrupted the files will be saved and the software will resume the transfer when it reconnects to the network.
- After successful transfer from the DVM to the designated computer the files will be automatically uploaded into VideoManager.
- All file transfers will be logged for a complete audit trail.

VIDEOMANAGER SERVER SOFTWARE

Secure Centralized Video Management Client/Server Software

- All the same features and functions of the standalone version of VideoManager.
- View, Upload, Playback, Search and Manage video files from any networked computer with proper access rights.
- Multiple user access to video files.
- Individual user passwords and permissions.
- Secure and reliable enterprise level SQL server database.

LIVE STREAMING VIDEO

The Digital Video Mirror is now even more functional with the capability of live streaming video.

- Centralized live access and management to all cameras in one dashboard.
- Multiple real-time access to cameras without quality loss.
- Agency access and sharing real-time or archived video with other agencies via the Web, without proprietary software.
- Video hosted from a highly secure data-center with redundant bandwidth and power.
- Automatic recording and backup at the datacenter. No need to manually download streaming video from the camera.

Provides a "Virtual Partner" to police officers in the field. Real-time situation analysis with headquarters.
